

Safety Tip of the Week

Your Safety Is Our Business®

Volume 1, Issue 4

January 26th, 2014

Avoiding Electrical Shocks

- Always make sure electric tools and equipment is properly grounded.
- Always check to be sure the grounding system is complete.
- Use heavy duty grounded extension cords.
- Remember water and electricity don't mix!
- Never work on or around a live electrical circuit.
- Treat every electric wire as if it were a live one.
- Inspect equipment and extension cords before each use.

When you gamble with safety you bet your LIFE!!
